

# Surveillance and Detection of Carbapenem-resistant Enterobacteriaceae

NATIONAL LABORATORY TRAINING NETWORK

**Maria Karlsson, Ph.D.**  
**Surveillance Activity**  
**Lead, Clinical and**  
**Environmental**  
**Microbiology Branch,**  
**NCEZID, CDC**

**This webinar will present an overview of carbapenem resistance mechanisms and the geographic distribution of the carbapenemase-producing Enterobacteriaceae in the United States. Laboratory methods used to detect carbapenemase-producing Enterobacteriaceae will also be discussed.**

# FREE WEBINAR

- Locate the course online under Live Webinars at [www.cdc.gov/labtraining](http://www.cdc.gov/labtraining).
- Follow the link to register for the course in TRAIN.

## CEUs:

The Centers for Disease Control and Prevention, Laboratory Training and Services Branch, is approved as a provider of continuing education programs in the clinical laboratory sciences by the ASCLS P.A.C.E.® Program.

This webinar is approved for 1.0 hour of P.A.C.E.® credit, and has been approved for 1.0 contact hours in the General (Microbiology/ Mycology/ Parasitology) category for Florida Laboratory Licensees.

**P.A.C.E.® Course#: 288-018-16 Florida Course#: 20-577176**

## Objectives:

At the conclusion of this program, the participant will be able to:

- List the most common mechanisms of carbapenem resistance in the U.S.
- Describe the geographic distribution of the carbapenemase-producing Enterobacteriaceae in the United States
- Discuss laboratory detection of Enterobacteriaceae that produce carbapenemases

## Target Audience:

This basic-level webinar is of interest to public health laboratorians.

## Special Needs

Course content is closed captioned where applicable and optimized for a screen reader.

Sponsored by the National Laboratory Training Network (NLTN). The National Laboratory Training Network is a Training System Sponsored by the Association of Public Health Laboratories (APHL) and The Centers for Disease Control and Prevention (CDC)
